Our Motto is "to do more than is expected.. for client, project and community." by offering "Quality", "Unmatched Service", and "Satisfaction" from our electrical contractors to you your needs and expectations.

What really matters to us is getting the job done right from start to finish, whether it's renovating a room or making every day home repairs. By choosing qualified professionals to do the job, you not only lower the risk of property damage and personal injury, but T. Lane Electric, Inc. does the job to (NEC) The National Electric Code. Our purpose is to safeguard persons and property from hazards arising from the use of electricity. T. Lane Electric, Inc. takes the safety of our customers very seriously. We go one step further in letting you the customer know your options for further expansion. We strive to achieve the highest levels of customer service- by setting standards for our employees. Our employees as electrical contractors are professionals dedicated to the ethical, responsible, and professional treatment of our customers, and are scheduled for the job they are skilled or tooled to complete. So whether you are in need of new installations, home repairs, or remodeling jobs, contact us in St. Joseph, Missouri, for superior electrical installation and repair services.

INSURED, LICENSED, BONDED

Residential

Our typical residential jobs include everything from troubleshooting service calls and replacing a fuse box to accommodate new kitchen appliances, to remodeling projects that require electrical upgrades such as new interior lighting or installing control systems for a pool and spa. T. Lane Electric, Inc. also does pre-wiring for new home construction and has expertise with low voltage systems involving voice, data, and video wiring systems, such as those for telephones, and computers. Our electricians are experienced with coaxial, cable for home and office needs.

Commercial

T. Lane Electric, Inc. services commercial accounts, performing preventive maintenance, including periodic inspection of equipment and facilities to locate and correct problems before a breakdown or injury occurs. Having a contracted electrician can safeguard your company's productivity, reputation and safety record. In the event that a breakdown does occur, we are on call to make the necessary repairs as quickly as possible in order to minimize any inconvenience.
